Roman costumes (Filmstrip) Schaeffler Division of Christian Education, Oberlin Graduate School of Theology, 1954.
36 fr., color, 35 mm. (Drama in the church and school)
Revised version of the 1949 filmstrip of the same title.
With manual.
Supplemented by the book entitled Drama in the church and school, by Virginia Witk Elieker.
Summary: Explains that Roman characters are often needed in Biblical plays, but that funds are not always available for making or renting armor and accessories to build an authentic-looking scene. Shows how to use cardboard, wood, and paint in order to give actors a definite appearance of being Roman.
Credits: Producer, Ruth Lester; written by Virginia Witk Elieker. —Another issue. b&w.

The Russian Communist revolution (Motion picture) KRMA-TV. Released by NET Film Service, 1958.

20 min., ed., b&w, 16 mm. (Twentieth century revolutions in world affairs)
Summary: Reviews the development of communism in Russia during the twentieth century. Introduces the concept that communism has two faces: one seen by the people of the United States and other advanced nations of the West, the second viewed by the underprivileged people of the world. Uses documentary film footage to show actual scenes of the communist revolution, the rise of Lenin and Stalin, the effects of World War II, and the industrial, agricultural, and scientific changes in Russia. Summarizes the spread of communism after World War II, and the outbreaks of violence in Poland, Berlin, and Hungary. Concludes with a brief statement concerning the best method of combating the rise of communism. Host is C. Dale Fuller.

The salmon's struggle for survival (Motion picture) Federal Dept. of Fisheries, Ottawa. Made and released by National Film Board of Canada, 1957.

27 min., sd., color, 16 mm.
Summary: Explains how a dilemma facing fisheries authorities of Canada's west coast is being met and overcome: the need, on the one hand, to use the waters of the Fraser and other British Columbia rivers for industrial and public uses and, on the other, to keep them uncontaminated and unobstructed so as not to impede the Pacific salmon in its annual upstream migration to fresh-water spawning grounds. Illustrates how various technological innovations have been developed to assist the salmon in its struggle for survival.

Credits: Producer, David Bairdow; director, Walford Hewitson; documentary, Jack Olsen; narrator, Rod Knapp; music editor, Robert Fleming; photographers, Grant Crabtree, Reginald Morris; film editors, Victor Jobin, Lucie Marleau.

Scandinavia—Norway, Sweden, Denmark (Motion picture) Encyclopedia Britannica Films, 1962.

22 min., sd., color, 16 mm.
Second edition.
With teachers guide.
Summary: Discusses the cultural ties and physical geography of the Scandinavian countries, and describes the contrasts in regional patterns of living, natural resources, and types of industrial development in each of the Scandinavian countries. Explores the rugged beauty of Norway's fjords and fishing grounds, the rich farmland of Denmark, and the vast timberlands and mining regions of Sweden. Shows how the people of Scandinavia, through cooperative action and industry, have achieved a uniformly high standard of living.

Summary: Discusses abnormal shyness in children—its causes and how, through a greater understanding by parents and teachers, this problem may be dealt with. After portraying the lonely existence of a typical shy adult, presents the case histories of three children. Shows how a psychiatrist from the Child Guidance Clinic, studying their conditions, reveals the confidence-destroying demands of parents which predisposed the children to shyness; and how teacher, psychiatrist, and parents bring about a change in the children's attitudes.

Slum clearance (Motion picture) T. W. Wilson Associates, 1956. Released by NET Film Service.

29 min., sd., b&w, 16 mm. (Point of view)
Summary: Roscoe Drummond, Washington columnist for the New York Herald Tribune, seeks a point of view on slum clearance and housing through interviews with a subject expert and two opinion representatives. Estimates that it will cost America \$100 billion to clear the nation of slums and stop the deterioration of cities. Presents arguments for the participation of the Federal Government in solving this crisis, as well as arguments for the participation of private enterprise with the support of local citizens and governments.

So many books (Filmstrip) National Film Board of Canada, Montreal, 1958.
41 fr., b&w, 35 mm.
With manual.
Summary: Captioned photographs of children entering the world of books for the first time. Shows how one little boy is introduced through the windows of a book store, another has stories read to him by an older sister, and a third is taken to a children's library by his mother where he learns how to make his own selection and to borrow books. Contrasts the wondering attitude of these three little boys with that of a group of kindergarten children who quietly enjoy the many books in their classroom, and of children at a public library who have become accustomed to using books.
Credits: Producer, Hans Müller; photographer, Marian Taylor, drawings, Jim Donohue.

Kodachrome.

Summary: Uses original paintings of the battles and events of the Revolutionary War to tell how the officers of the Continental Army fought to win liberty for the American Colonies. Describes the founding in 1783 of the Society of the Cincinnati to keep alive the high motives of patriotism and public service of these officers. Shows portraits of some of the founding members, including George Washington, Henry Knox, Von Steuben, and Alexander Hamilton, and includes views of original documents pertaining to this patriotic society. Discusses the part played by France in the war and the establishment of the French Society of the Cincinnati. Includes scenes of a triennial meeting of the society held in France in June 1959.

The sounds of language (Motion picture) Modern Language Association and the Center for Applied Linguistics in cooperation with Teaching Film Custodians. Made by Reid H. Ray Film Industries. Released by Teaching Film Custodians, 1961.

33 min., sd., b&w, 16 mm. (Principles and methods of teaching a second language, no. 2)
With work paper.
Summary: Explains that each language has its own sound system of characteristic intonation patterns, rhythms, stresses, and sounds, and points out that a problem in learning a second language is the tendency to carry over sound patterns of one's native speech. Compares the sound features of various languages and explains the concept of phonemic contrasts. Uses a class in Spanish for English speakers to demonstrate the modern approach to teaching the important sound features of a second language, giving proper balance to intonational patterns, rhythms, stresses, and pronunciation of individual sounds.

The spruce bog; an essay in ecology (Motion picture) National Film Board of Canada, Montreal, 1956. Released in the U. S. by McGraw-Hill Book Co., 1956.

23 min., sd., color, 16 mm.

Summary: Describes the conditions under which a spruce bog is formed, with details of the plant types found at successive stages of development from open water to mature spruce forest. Time-lapse photography illustrates the growth and decay of vegetation preceding the appearance of sphagnum moss which chokes off water to make the floor of the forest. Discusses the commercial uses of peat extracted from such bogs, and the value of black spruce to Canada's pulp industry.

Credits: Producer, writer of commentary, and film editor, J. V. Durden; director and photographer, R. D. Muir; narrator, Geoff. Hogwood; diagrams, Evelyn Lambert; music score, R. Fleming.

Released by NET Film Service.

29 min., sd., b&w, 16 mm. (Nature of life)

Summary: Discusses and illustrates the nature and causes of movements in plants and animals in response to stimuli and the sources of energy necessary for these movements. Demonstrates through animation, models, laboratory apparatus, and with a living chicken embryo how movement takes place in plants and animals, and concludes that the internal basic reactions in the protoplasm of the cell which cause movement are about the same in all living organisms.

Features Dr. H. Burr Roney, associate professor of biology at the University of Houston.

The story of Palomar (Motion picture) California Institute of Technology. Released by Encyclopedia Britannica Films, 1960.
39 min., sd., color, 16 mm.
With teachers guide.
Summary: The story of the giant 200-inch telescope on Palomar Mountain, photographed over the period of years during which the giant telescope was planned and designed. Shows the grinding of the huge mirror, the tedious journey of the mirror up the mountain-side, and finally the giant instrument in operation. Includes photographs of distant galaxies made through the 200-inch telescope, and compares these photographs with others made by earlier and smaller telescopes, showing how man's view of the heavens has been extended by the new Palomar installation. Includes animated sequences which show the principles of optics which are used in reflecting telescopes of all sizes.

Tariffs (Motion picture) T. W. Wilson Associates, 1956. Released by NET Film Service.

20 min., ed., b&w, 16 mm. (Point of view)

Summary: Roscoe Drummond, Washington columnist for the New York Herald Tribune, seeks a point of view on the United States tariff policy through interviews with a subject expert and three opinion representatives. Explains popular misconceptions of the tariff problem and fundamental facts involved in this policy issue. Presents arguments for high tariff rates and protectionism for American industry as well as arguments for a liberalized tariff program designed to establish freer world trade. Discusses the alternative compromise of controlling American trade barriers on a selective basis so as to protect those industries which are especially vulnerable to foreign competition.

Time and clocks (Motion picture) Educational Services. Made by Encyclopædia Britannica Films. Released by Modern Talking Picture Service, 1959.

27 min., sd., b&w, 16 mm. (Physical Science Study Committee course film)
Based on the textbook Physics, by the Physical Science Study Committee.
Summary: Professor John G. King discusses concepts of time measurement and shows various devices used to measure and record time intervals from 1 second down to 10 seconds. He points out that the accuracy of a clock can be judged only by comparison with another clock. The question of what time is, psychologically and physically, is raised briefly as well as the question of a possible limit to the subdivision of time.

Time and terrain (Motion picture) National Film Board of Canada, with the assistance of the Geological Survey of Canada. Released by National Film Board of Canada, 1948.

19 min., sd., color, 16 mm.
French version released under the title Le temps et la terre.
Summary: Uses animation to present a study in Canadian geology. Shows how the volcanoes which once covered much of Canada, crumbled before age-long attacks of rain and wind, how silt was carried to the ocean, until, after eons had passed, most of the land sank entirely under the water, how layers of silt turned to layers of rock under the sea until violent earth pressures squeezed them suddenly upward to form jagged mountains, striped with twisted and tilted strata. Describes the ice age which followed, and the birth of Canada's lakes and rivers.

Understanding children's play (Motion picture) Child Study Dept., Vassar College. Made by L. Joseph Stone. Released by New York University Film Library, 1948.

11 min., sd., b&w, 16 mm. (Vassar studies of normal personality development)

Summary: First in a series designed to show how adults can understand and help children through observation of their use of toys and play materials. Presents a panorama of a nursery schoolroom, showing a variety of materials and how they may be made easily accessible to children: blocks, poster paint, crayons, clay, water, workbench, finger paint, miniature-life toys, and housekeeping equipment.

Stresses that the adult should watch and listen to each child at play in order to learn how to help the child grow and develop in his own way. Filmed at the New York Kindergarten Association's Nursery School.

Credits: Producer, Caroline Zachry Institute of Human Development; photographer, Josef Bohmer.

The U. S. and economic challenge from abroad (Filmstrip)
Current Affairs Films, 1962.

41 fr., b&w, 35 mm. (Current affairs filmstrip series)

With discussion guide.

Summary: Examines the challenge which the economy of the United States faces today from the state-controlled Soviet economy and from the European Common Market. Points out the arguments for and against freer trade, pointing out that only Congress can decide how to meet the economic challenge from abroad. Captioned photographs.

The U. S. in a revolutionary world (Motion picture)

KRMA-TV. Released by NET Film Service, 1958.

29 min., sd., b&w, 16 mm. (Twentieth century revolutions in world affairs)

Summary: Discusses the debates in the United States since World War I, over the issues of isolation versus involvement in world affairs. Reviews the participation of the United States in the League of Nations, the neutrality acts of the 1930's, foreign aid following World War II, and the extent and character of U. S. participation in the Korean conflict. Concludes that the United States is permanently involved in world affairs, but that a great debate will continue as to the meaning and content of involvement. Host is C. Dale Fuller.

The universe (Motion picture) KQED, 1956. Released by NET Film Service.
20 min., sd., b&w, 16 mm. (The elements)
Summary: Considers the earth in relation to the solar system and to the universe; indicates the chemical composition of the universe and examines means of studying it; explains theories regarding the age, origin, and source of energy of the stars. Features Dr. Glenn T. Seaborg of the University of California.
1. Earth. 2. Solar system. I. San Francisco. Television station KQED. II. National Educational Television Film Service. Series: The elements (Motion picture)
523 Fi A 58-1759
National Educational Television Film Service

Universe (Motion picture) National Film Board of Canada, 1960.
28 min., sd., b&w, 16 mm.
Summary: Shows Dr. Donald MacBae, professor of astronomy at the University of Toronto, in a night-long vigil at the Davis Dunlop Observatory, as he explores the solar system. Uses animation, life photography, and special effects to show scenes of the pockmarked moon, Earth's sister planets, the rings of Saturn, the gaseous geyseers of the sun, and other galaxies swirling into infinity.

Colonial Film and Equipment Company

Universe and solar system, grade 2 (Filmstrip) Colonial Films, 1960.
30 fr., color, 35 mm. (Advanced elementary science series D, no. 2)
With teachers guide.
Summary: Explains that the earth is one of nine planets traveling in its own path around the sun, that the tilting of the earth's axis causes the seasonal changes, that the amount of heat and light received by the earth varies with its position in its orbit, that heat changes cause weather changes, and that the rotation of the earth from west to east on its axis causes day and night. Shows how the force of gravity and the speed of the earth's movement hold the earth in its orbit around the sun and how the force of gravity pulls objects toward the earth.
Credits: Director, Woodford B. Baker.

Universe and solar system, grade 3 (Filmstrip) Colonial Films, 1960.
43 fr., color, 35 mm. (Advanced elementary science series D, no. 3)
With teachers guide.
Summary: An overview of the solar system. Explains that all stars are suns which are made of hot, glowing gases giving off radiant energy, that each of the nine planets rotates on its own axis and revolves around the sun in its own orbit, that planets shine because they reflect the light of the sun, that some planets have moons, or satellites moving in fixed orbits, that individual stars are located in relatively fixed positions forming patterns called constellations, and that in the universe there are galaxies or systems of stars like the Milky Way. Includes scenes of man-made satellites.
Credits: Director, Woodford B. Baker.

Uretero-ileo-urethral anastomosis—a bladder substitute (Motion picture) U. S. Veterans Administration, 1959.

18 min., sd., color, 16 mm.

Summary: Explains that uretero-ileo-urethral anastomosis is a method of urinary diversion which may be used following total cystectomy, that this technique substitutes a segment of ileum for the normal bladder, and that to this ileum are anastomosed both ureters and urethra, allowing both urinary continence and relatively normal voiding through the normal channel. It does not lead to upper urinary tract distention. There is, however, some reflux of both ureters, as demonstrated on fluoroscopy. Blood chemical studies remain normal.

Virtuoso Franz Liszt as composer (Motion picture) Teaching Film Custodians, 1960.

14 min., sd., color, 16 mm.
Excerpts prepared for school use from Goetz-Vidor Pictures' motion picture released by Columbia Pictures Corporation in 1939 under the title Song without end.
With teaching guide.

Summary: In 1961 on the eve of his wedding to Princess Wittgenstein, Franz Liszt gives a concert of his own compositions including Liebestraum, Second Hungarian rhapsody, and First piano concerto. Following the concert Liszt and his fiancée abandon their wedding plans when they learn that the annulment of her previous marriage has been rescinded by the Papal court, and Liszt turns to the composition of sacred music.

Credits: Producer, William Goetz; director, Charles Vidor. Cast: Dirk Bogarde, Capucine.

Visual perception (Motion picture) Educational Testing Service, 1959.

20 min., sd., color, 16 mm. (Horizons of science, vol. 1, no. 1)
Produced in association with the National Science Foundation.
With discussion and study guide.
Summary: Dr. Hadley Cantril discusses his investigations at the Perception Demonstration Center at Princeton University of the effects of some of our assumptions on what we see. Shows a distorted room that looks normal, with illustrations that include a rotating trapezoid that appears to oscillate, balloons that seem to move when in reality they are being inflated and deflated, or illuminated and darkened.

What's under the ocean (Motion picture) Film Associates of California, 1960.

14 min., sd., color, 16 mm.
 With study guide.
Summary: Describes various ways in which scientists study the ocean: taking cameras to study plants and animals in shallow depths, going in the deepest ocean floor in such special craft as a bathyscaphe, and using instruments on research ships to study bottom materials and to map vast areas of the ocean floor. Points out that scientists have found a long mountain range dividing the Atlantic in two, and in the Pacific, thousands of volcanoes and deep trenches.

Wheat rust (Motion picture) National Film Board of Canada with the cooperation of the Canada Dept. of Agriculture: Laboratories of Plant Pathology and Cereal Breeding, Winnipeg. Released by National Film Board of Canada, 1958.

17 min., sd., color, 16 mm.
 An abridged version of the 1955 motion picture entitled *Man against a fungus*.

Summary: Uses greatly magnified pictures to illustrate how rust fungus performs its work of destruction on wheat. Animated maps trace the northward movement of rust contagion in the northern hemisphere, particularly in North America, following the seasonal planting of crops. Shows in the laboratory of a plant breeder, the evolution of new rust-resistant wheat hybrids produced by combining in one plant the genes which govern the desired characters or qualities, explaining that while the scientist breeds tougher varieties of wheat, the fungus is busy developing new strains to attack them.

Credits: Producer, J. V. Durden; director and script, Maurice L. Constant; animation, Barry Helmer; music, Louis Applebaum; cinematography and time-lapse photography, J. V. Durden, M. L. Constant; photographer, Grant Crabtree.

Wheat rust (Motion picture) National Film Board of Canada with the cooperation of the Canada Dept. of Agriculture: Laboratories of Plant Pathology and Cereal Breeding, Winnipeg, 1958. Released in the U. S. by Encyclopedia Britannica Films, 1959.

16 min., sd., color, 16 mm.
 With teacher's guide.

Summary: A study of the complex life history of a parasitic plant, the stem rust of wheat, a fungus which must live on two host plants. Points out that man has brought this major threat upon himself by muzzing together vast areas of wheat, and thus has disturbed the natural balance of life. Shows how man works to control the fungus through breeding new strains of wheat with rust-resistant qualities.

Your forest heritage (*Motion picture*) National Film Board of Canada, Montreal, for Dept. of Resources and Development, 1951. Made by Crawley Films.

15 min., sd., color, 16 mm.

Summary: Describes the menace of fire to Canada's forests. Shows scenes of undisturbed birds and animals suggestive of the beauty and serenity of the woods until a carelessly dropped match or a half-extinguished campfire starts a holocaust of smoke and flame that leaves nothing but gaunt, charred skeletons of once proud trees. Urges that precaution be exercised to prevent this recurring tragedy, and shows what the Federal Forestry Branch and trained fire fighters do to safeguard forests.

- Zoo animals—mammals, part 1 (*Motion picture*) Academy Films, 1957.
11 min., sd., color, 16 mm.
Kodachrome.
Summary: A behind-the-scenes visit with the zoo doctor at the San Diego Zoo. Explains that the right kind of a zoo is a good place for animals to live, and that zoo animals, in family groups in natural surroundings, and with proper food, are happy and contented. Shows a kinkajou, a lesser panda, the elephant yard, lion cubs fed from a bottle, Bengal tigers, the commissary, and the feeding of the sea lions.
Credits: Producer, James A. Larsen; script, Margaret Divisla.
